

April 2023

Dear Flowing Wells Irrigation District Customer:

In preparation for the Environmental Protection Agency's revised lead and copper rule, we are reaching out to inquire as to your knowledge of the water line material type leading from the water meter to your home and/or business.

If you are able provide the District office with any documents or information pertaining to your water line, it would greatly assist our staff in accomplishing the service line inventory we are currently conducting.

Below are examples of materials that may have been installed on your property. Please select any that may apply and email your response to rrubal@fwid.org. Hard copies are available at the District office.

Should you have any questions, do not hesitate to call (520) 887-4192. Thank you.

- Plastic or PVC
- Galvanized
- Lead
- Copper
- Pex Pipe

Please provide your contact information:
